

This document provides key investor information about this fund ("Fund"). It is not marketing material. The information is required by law to help investors understand the nature and the risks of investing in this Fund. Investors are advised to read it so to make an informed decision about whether to invest.

Green Ash SICAV - Chanos Equity Long / Short Fund, a Subfund of Green Ash SICAV

Management Company
Share Class
ISIN

MultiConcept Fund Management S.A., Luxembourg
I H cap. EUR
LU2534794263

Objectives and investment policy

This Fund is actively managed without reference to any benchmark aiming to achieve capital appreciation and attractive risk adjusted returns by implementing a long/short equity strategy, which targets a low correlation to the underlying equity markets and low levels of volatility. It mainly invests, either directly or indirectly in a diversified portfolio of equities and equity-type transferable securities (including American depositary receipts ("ADR"s) or global depositary receipts ("GDRs")). The Fund invests without being limited to a specific industrial sector or geographical scope; a proportion of the Fund's assets may be invested in Emerging Markets. In order to reach its objective, the Fund can use structured products and derivative instruments to protect against movements in security

prices and for efficient portfolio management. In case of investments in Total Return Swaps, the maximum leveraged value of the investments might reach up to 500% of the Fund's net assets. The Fund uses derivatives to reduce the impact of changes in currency exchange rates on the performance for this Share Class. The investor can buy or sell shares on a daily basis (Luxembourg bank business days). This Share Class does not make regular distributions. The Fund shall bear the costs of standard charges incurred by the Fund through securities transactions in relation to the portfolio. These charges are not included in the "Charges" section of this document.

Risk and reward profile

Risk profile

The Fund's risk and reward profile shows the expected variations in value of an investment in this Fund. It is based on performance data over the past five years respectively simulated performance in the case of missing history and the Fund's risk limit. The Fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the Fund is risk free.

Why is the Fund in the specific category?

The fund aims to achieve its return while respecting a target risk budget. The level of the risk and reward indicator reflects the targeted risk for the Fund. Amongst other, equity prices mainly reflect the expected prospects of firms, as estimated by market participants. Expectations tend to fluctuate more strongly in times of higher uncertainty. The combination of long and short positions held by the Fund may reduce fluctuations. The Fund's use of leverage may lead to an amplified reaction to market movements. Short positions may expose the Fund to higher market risk. The particularly active management of the Fund may lead to frequent

changes of the Fund's risk profile. The Fund's application of Swing Pricing also impacts its risk and reward profile.

Are there any other particular risks?

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. However, this Fund's investments should generally have good liquidity.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Fund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

Charges

One-off charges taken before or after the investment	
Entry charge	Not applicable
Exit charge	Not applicable
This is the maximum amount that may be deducted from the investor's money before it is invested or before the proceeds of the investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	1.52%
Charges debited to the Fund under certain specific conditions	
Performance fee	20.0% of any excess return the GAV achieves over the High Water Mark

Charges debited to investors are used to pay for the cost of running the Fund, including marketing and distribution costs. These charges reduce the potential growth of the investment.

The **entry** and **exit charges** shown are the maximum figures that can be charged to the investor. Investors may obtain the fees effectively applied from their individual financial adviser or distributor.

For a maximum of 12 months from October 7, 2022, the **ongoing charges** figure is based on estimated expenses. From October 2023, the ongoing charges figure is based on last year's expenses for the year ending October 2023. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment undertaking.

The Investment Manager is entitled to a **performance fee** fee if the net asset value per share before deduction for any accrued Performance Fee (i.e. the "Gross Asset Value" or "GAV" per share) of the Fund exceeds a predefined reference value, subject to additional conditions set forth in the prospectus. A performance fee may be crystallized at the end of the respective Calculation Period and paid in arrears within thirty (30) days, based on the GAV. There may also be circumstances where a performance fee will be incumbent on investors who are redeeming from the Fund during the reference period while the value of the GAV applicable to the redemption is lower than the value of the GAV on the

subscription date. For further information about charges, investors should refer to chapter 20 of the Fund's prospectus, which is available at <https://www.credit-suisse.com/microsites/multiconcept/en.html>.

The single swing pricing method (SSP) is used to determine the issue and redemption price of the Fund. For further information about the implication of SSP, investors should refer to the relevant chapter "Net Asset Value" of the prospectus, which is available at <https://www.credit-suisse.com/microsites/multiconcept/en.html>.

Past performance

Performance disclaimer

Please note that performance in the past is not a reliable indicator of future results.

Charges and fees

The performance chart shows the Fund's investment returns as a percentage change in NAV from one year-end to the next in the Share Class currency.

The fees for the ongoing fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.
