What is this product?**Type**

This product is a UCITS Fund. The Fund is a sub-fund of GenFunds Global Plc, an open-ended investment company with variable capital incorporated with limited liability in Ireland and established as an umbrella fund with segregated liability between funds. The Fund's assets are held through its Depository, which is European Depository Bank SA, Dublin Branch. Further information in relation to the Fund should be obtained from your financial adviser, distributor or is available at <https://bridgefundservices.com/>. This is an active, return-seeking multi-asset investment fund which has considerable latitude over its asset allocation, which may employ leverage and may own sophisticated instruments such as futures and options.

Investors may not get back all the money invested and an investment in this Fund should only form part of an investor's total portfolio. Investors should discuss the suitability of this Fund with their professional adviser.

Term

This Fund is open-ended and has an indefinite duration. The Fund may be terminated at any time in line with the constitutional documents of the Company.

Requests to buy, exchange or sell Fund shares that are received and accepted by the administrator by 3:00 PM CET (2:00 PM UK time) on any Fund business day are ordinarily processed the same day using valuations of that day. Settlement of Redemption requests typically occurs within 5 business days after a request has been accepted. Further details on the conditions associated with the Redemption of shares is included under the section "How long should I hold it and can I take money out early?" At any time the Company may by giving not less than four nor more than twelve weeks' notice (expiring on a Dealing Day) to all Shareholders in the Company or in any Sub-Fund or Class, redeem at the Redemption Price on such Dealing Day, all (but not some) of the Shares in the Company or in the relevant Sub-Fund or Class not previously redeemed. The Company may at any time redeem or request the transfer of Shares held by Shareholders who are excluded from purchasing or holding Shares under the Articles. Any such redemption will be made on a Dealing Day at the Redemption Price on the relevant Dealing Day on which the Shares are to be redeemed. Please also refer to Compulsory Redemption of shares/FATCA/Application for shares for further information on compulsory redemptions.

Objectives

The investment objective of the Fund is to provide a positive absolute return and capital appreciation independent of market conditions over the medium to long term by investing in a portfolio of equities and equity related securities, debt securities and currencies.

The Fund will invest in asset classes including equities, equity related securities (such as warrants, convertible bonds and exchange traded funds), derivatives (including those simulating long and short positions which may perform differently from the market as a whole), government and corporate debt securities, collective investment schemes (including exchange traded funds), commodities, currencies and cash.

Essential features of the Fund:

- The Fund has no specific target market or asset class and any one asset class may account for up to 100% of the assets of the Fund at any given time.
- The Fund may invest up to 10%, in aggregate, of its net assets in UCITS and/or non-UCITS collective investment schemes.
- You can buy and sell shares in the Fund on every business day.
- The Fund has the discretion to invest in a range of investments as described above with no need to adhere to a particular benchmark.
- This share class applies for "Reporting Fund" status, thus income from the Fund will be added to the value of your investment and may be distributed after year end.
- The Fund may invest up to 100% in below investment grade debt securities. The success or failure of the Fund is based on the Investment Manager's expertise in allocating assets across the most opportune asset classes at any given time.
- Derivatives may be used for investment purposes and to manage the risk profile of the Fund.
- The Fund may take long and short positions in any asset class.

Intended retail investor

This product is for return-seeking investors with a long-term investment horizon. Investors should expect the Fund to deviate meaningfully from its benchmark and while the Fund provides daily liquidity giving investors ready access to their investment investors in this strategy should be able to tolerate volatility. Emphasis is on capital appreciation not income. Investors should understand the Fund's risks as described below in the Risk section and only invest if they can bear a loss on the initial investment. For full investment objectives and policy details, please refer to the Investment Objectives and Investment Policy in the Fund's Supplement to the Prospectus, which are available at <https://bridgefundservices.com/>. The NAV per share of the Fund will be published to this website daily, and will be updated following each calculation of NAV.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

The Fund is subject to various risks including: Liquidity Risk, Counterparty Risk, Financial Techniques Impact, Market risk, Fixed Income Security Risk, Custody risk. For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

What happens if Bridge Fund Management Ltd is unable to pay out?

For the protection of investors the Fund's assets are held by an independent depositary, so the Fund's ability to pay out would not be affected by the insolvency of Bridge Fund Management Limited. If the Fund is terminated or wound up, the assets will be liquidated, and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. There is no compensation scheme protecting you from this scenario

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs EUR	740 EUR	2,120 EUR
Annual cost impact (*)	7.4%	3.9% per year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.1% before costs and 7.2% after costs.
